

Fencing Requirements City of Beech Grove, Indiana

No permit is needed for a fence, but the following requirements must be met:

Have the property surveyed so you can be sure your fence is on your property. A fence can be on the property lines between houses.

A solid privacy fence can be six (6) foot high in the back and on the sides, but can only go forward as far as the front of the house.

If fencing is desired past the front of the house, it must be constructed of a see through material such as chain link, and should not be more than four (4) foot high.

If there is a grass strip between the sidewalk and the curb, the fence may be put along the sidewalk.

If there is neither a sidewalk, nor a grass strip, the fence must be back ten (10) feet from the street edge.

If a house is on a corner lot, then both streets are considered to be front yards.
